

Anuj Kumar

Data Visualization Engineer — Power BI Custom Visuals | React · D3.js · TypeScript

Daltonganj, Jharkhand, India · +91 99318 24747 · anujshaan261@gmail.com · linkedin.com/in/anujshaan · github.com/anujshaancoding

SUMMARY

Data Visualization Engineer with 4+ years building production-grade custom Power BI visuals in React, D3.js and TypeScript. Delivered 7+ marketplace-deployed visuals — several earning **“Editor’s Choice”** — used by enterprise customers within Microsoft Power BI environments. Specialist in the Power BI Visuals API, advanced D3 chart engineering, and high-performance analytics components; independently led custom-visual development across multiple client projects.

CORE SKILLS

Power BI Custom Visuals: Visuals API, capabilities.json & data-view mapping, formatting model & pane, selection & cross-filtering, tooltips, bookmarks, pbiviz tooling, marketplace publishing

Data Visualization: D3.js (scales, axes, transitions, hierarchical & force layouts), SVG / Canvas rendering, large-dataset performance optimization

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass

Also: Shopify theme development, WordPress, Google Tag Manager, GA4, Git

KEY CUSTOM VISUALS DELIVERED

Sankey Chart · Network Graph (nodes & links) · **Activity Gauge · Linear Gauge · Pie / Donut Chart · Power Table** — an Excel-style matrix visual rendering multiple in-cell mini-charts (bar, pie, bullet, sparkline, gauge) across rows and columns for dense, configurable reporting.

EXPERIENCE

Frontend Developer — Power BI Custom Visuals, Truviz Pvt. Ltd.

Remote · May 2023 – Jun 2026

- Engineered and delivered **7+ custom Power BI visuals** deployed to production and actively used by customers within Microsoft Power BI environments.
- Built visually rich, performance-focused analytics components; multiple visuals received **“Editor’s Choice”** recognition in the Power BI custom visuals marketplace.
- Designed an Excel-style **“Power Table”** matrix visual supporting multiple in-cell chart types (bar, pie, bullet, sparkline, gauge) for dense, fully configurable reporting.
- Partnered with clients to translate complex business requirements into intuitive, interactive reporting experiences.
- Independently led custom-visual development over the last year — introducing new features, improving usability, and ensuring on-time delivery across multiple team projects.

Frontend Developer, Pinchforth

Remote · Jun 2021 – Jan 2023

- Built interactive data visualizations using **D3.js and ReactJS**.
- Developed complex, responsive front-end interfaces in React and Sass.
- Delivered Shopify theme customization and WordPress page/form development, integration and maintenance.
- Implemented web analytics and tracking with Google Tag Manager, GA4 and Google Sheets.

PROJECTS

- Power Table — open-source Power BI custom visual** — Power BI Visuals API, React, D3, TypeScript. Standalone Excel-style matrix visual rendering in-cell data bars, bullets and sparklines, with selection/cross-filtering and a full formatting pane; built to the AppSource certification checklist. github.com/anujshaancoding
- @anuj/dataviz-components** — React, D3, Vitest, Storybook, GitHub Actions CI. Tested, tree-shakeable React + D3 chart library (gauge, Sankey, line, bar, KPI) with interactive docs and a hospital-operations dashboard demo consuming it. github.com/anujshaancoding

- **ResumeMatch AI** — Next.js 15, TypeScript, Prisma/Postgres, OpenAI. Resume-to-job-description matching app with a deterministic, offline-testable core, Docker, Sentry and Vitest. github.com/anujshaancoding

EDUCATION

Master of Computer Applications (MCA), Computer Science — National Institute of Technology, Raipur · 2018 – 2021

Bachelor of Computer Applications (BCA), Computer Science — BIT Mesra, Noida · 2015 – 2018
